10 Stability and reactivity

- **Reactivity** No further relevant information available.
- **Chemical stability**
- **Thermal decomposition / conditions to be avoided:** No decomposition if used according to specifications.
- **Possibility of hazardous reactions**
Hazardous polymerization may occur if mixed with epoxy resins. Excessive exothermic reactions will occur when mixed with epoxy resins in larger masses (>50 grams).
- **Conditions to avoid**
Heat is generated during the curing/crosslinking process when mixed with epoxy resins. Minimize the mass (refer to possibility of hazardous reactions) to prevent a premature exothermic reaction producing intense heat and smoke.
- **Incompatible materials:** Strong acids, strong bases, strong oxidizers, epoxy resins
