

WAKEFIELD THERMAL: THE ORIGINAL THERMAL MANAGEMENT COMPANY

WHY EXTRUDE WITH WAKEFIELD THERMAL?

Backed by nearly seven decades of thermal expertise, Wakefield Thermal Solutions is **the only U.S.-based thermal management provider with true in-house extrusion capability**. This vertically integrated foundation delivers unmatched design control, manufacturing precision, and supply chain confidence.

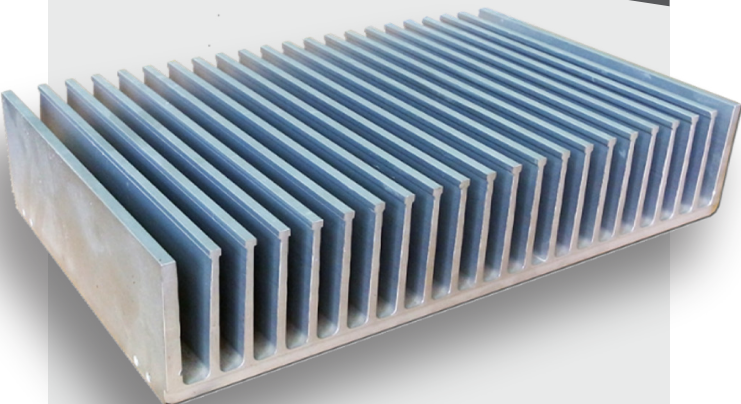

CAPABILITIES

Wakefield Thermal operates with 500,000 square feet of U.S. manufacturing capacity, combining extrusion, machining, finishing, assembly, and engineering support in a single fully integrated operation. No other supplier can fully replicate these capabilities.

**100% VERTICAL INTEGRATION: FASTER DELIVERY.
LOWER COST. IMPROVED QUALITY.**

EQUIPMENT

- In-house thermal extrusion (custom and standard profiles)
- CNC machining & milling
- Soldering
- Epoxy Bonding
- Skiving
- Assembly & finishing
- Rapid prototype-to-production programs
- Automated, lights-out manufacturing for scalability

As the only thermal solutions manufacturer capable of domestic in-house extrusion, we eliminate uncertainty from the supply chain, delivering consistent quality, stable lead times, and full accountability from concept through production. Whether your program is domestic or global, Wakefield provides the engineering depth and manufacturing reliability needed to support your project.

GLOBAL REACH WITH U.S. CONTROL

We are trusted by **more than 18,000 customers across key markets** for both standard and fully customized products, providing support from early design to full-scale production. While we maintain strategic support operations abroad, all core extrusion and machining remain domestic in the United States.

OUR VERTICAL INTEGRATION MEANS THAT YOUR PRODUCTS ARE UNAFFECTED BY:

- Tariff changes
- Overseas shipping delays
- Freight costs
- Stocking and JIT options locally
- Port congestion
- Unpredictable foreign manufacturing schedules
- Price fluctuations and instability

LEARN MORE ABOUT THE WAKEFIELD DIFFERENCE

While other competitors rely on outsourcing from offshore vendors, Wakefield Thermal builds in the U.S. We have faster time to market with less risk and full accountability from prototype to product, eliminating import delays.
